***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 5-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kanbara et al.

Kanbara et al. teach an automated analyzer having a base housing that supports and contains all of the elements(see figure 1), a rotary disk(12) that contains/holds the samples, a container body(4a) that holds a plurality of sample containers(4), rotating mechanism(col. 4 lines 29-30), analyzer(col.4 lines 53-56) that includes a controller to coordinate all of the functions and a cap manipulator(1) further comprising manipulator(45) that manipulates cap(16) in an open and closed positions.

***Allowable Subject Matter***

Claims 1-4 and 8-19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
